Tern Vizzy™ Light - Shine a light on me

Safety in the dark - Radi(c)ally Reinvented

Interbike, September 13th, 2016 - Urban transportation specialists

Tern Bicycles present the Vizzy™ Light. It projects 360° of radial 60-lumen light on the ground around a bike, creating a bright circle of protection to safeguard riders in low visibility situations. The Vizzy Light's halo provides a clear signal for road users to pass at a safe distance,

and illuminates riders' bodies, so drivers can react accordingly.

The Vizy Light is durable, weatherproof and beautifully encased. It even features a rearfacing LED light with five modes for long range visibility. It's safety in the dark– radically reinvented. The light features a built-in rechargeable Lipolymer battery (1000 mAh) that can easily be charged by Micro-USB. The Vizy Light will be available worldwide through www.premiumbikegear.com. The MSRP is \$40.
