Andros™ Quick-Release Adjustable Stem

### Angle Adjustment

1. Loosen the screws on the Andros Stem and adjust the angle and orientation of the handlebar for maximum comfort.

2. Adjust the angle and orientation of the handlebar by turning the screws clockwise or counterclockwise.

3. Re-tighten the screws to secure the handlebar in position.

### Basic Operation

1. Open the clamp and insert the handlebar into the Andros Stem.

2. Close the clamp to secure the handlebar in place.

3. Adjust the angle and orientation of the handlebar as desired.

### Introduction

This Andros™ Quick-Release Adjustable Stem is designed for easy and quick adjustment of the handlebar angle and orientation. It features a quick-release mechanism that allows for rapid adjustments while riding. The stem is compatible with most standard handlebar diameters and is suitable for a variety of cycling applications.

### Usage Notes

- **Adjustment Mechanism:** The quick-release mechanism is located on the underside of the stem, allowing for easy adjustment without the need for tools.
- **Stability:** The stem is designed to provide a secure and stable connection between the handlebar and the frame, ensuring a solid feel while riding.
- **Compatibility:** The Andros Stem is compatible with most standard handlebar diameters and can be used with a variety of bicycle frames.

---

**Instructions for Use:**

1. **Loosen the screws:** Use a standard L-wrench to loosen the screws on the Andros Stem.
2. **Adjust the angle or orientation:** Turn the screws clockwise or counterclockwise to adjust the angle or orientation of the handlebar.
3. **Tighten the screws:** Once the desired angle or orientation is achieved, tighten the screws to secure the handlebar.

---

**Technical Specifications:**

- **Material:** Aluminum
- **Color:** Black
- **Weight:** 250 grams
- **Bar Compatibility:** 25.4mm

---

**Maintenance Tips:**

- **Regular Cleaning:** Use a soft cloth to clean the Andros Stem after each ride.
- **Avoid Chemicals:** Do not use harsh chemicals or solvents to clean the stem.
- **Inspect Regularly:** Check the screws regularly for tightness and replace if necessary.

---

**Important Notes:**

- **Safety First:** Always wear appropriate safety gear while cycling.
- **Road Tests:** Test the adjustments on a safe, flat surface before riding on uneven terrain.
- **Emergency Preparedness:** Keep a spare set of screws in your tool kit in case of emergencies.
